

**Generate
Numbers**

Players put their name on the line any Green box as many as they want. After the green boxes are filled. Generate the numbers using the horizontal or vertical numbers in my football pool number generator. This is how you win add both teams scores at the end of the game. Example if dallas has 13 and jets have 14 you add the 13 and 14 and you get 27 last digit is 7 and that is your winner.
